

## Ideation Phase

### Brainstorm & Idea Prioritization Template

Date	02 July 2025
Team ID	LTVIP2025TMID48879
Project Name	Heritage Treasures
Maximum Marks	4 Marks

#### Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

#### Step-1: Team Gathering, Collaboration and Select the Problem Statement

### Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare  
🕒 1 hour to collaborate  
👥 2-8 people recommended

➔

#### Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A **Team gathering**  
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B **Set the goal**  
Think about the problem you'll be focusing on solving in the brainstorming session.

C **Learn how to use the facilitation tools**  
Use the Facilitation Superpowers to run a happy and productive session.

1

#### Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we [your problem statement]?

**Key rules of brainstorming**  
To run a smooth and productive session

🗣️ Stay in topic.

💡 Encourage wild ideas.

⏸️ Defer judgment.

👂 Listen to others.

🗣️ Go for volume.

👁️ If possible, be visual.

## Step-2: Brainstorm, Idea Listing and Grouping

### 2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

**Person 1**

- Build an interactive global map to visualize all World Heritage Sites with filters for region, type, and status.
- Integrate time-series charts showing visitor trends for each site.
- Add real-time alerts for sites listed as endangered or facing critical threats.

**Person 2**

- Show a funding vs. visitor ratio chart to identify sites that are over-visited but underfunded.
- Include a KPI section displaying current preservation status and last restoration year.
- Enable site-level drill-down dashboards for individual analysis.

**Person 3**

- Design a bar chart to highlight tourism revenue vs. conservation budget gaps.
- Display seasonal visitor heatmaps to suggest crowd control strategies.
- Create filters by tourist behavior.

**Person 4**

- Add impact scores for human activity on each site.
- Allow data export or reports for conservation action planning.
- Map sites with endangered species or ecosystems overlapping UNESCO zones.

**TIP**  
You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

### 3 Group Ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

**TIP**  
Add custom labels to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

**Cluster 1: Site Visualization**

- Global map of UNESCO sites with filters by region, type, and preservation status.
- Drill-down dashboards for individual site information and analytics.
- Mapping endangered species/ecosystems overlapping with UNESCO sites.

**Cluster 2: Tourism Trends & Impact**

- Time-series charts showing annual visitor trends for each site.
- Visitor seasonality heatmaps to detect crowding patterns.
- Bar charts comparing tourism revenue vs. conservation funding gaps.

**Cluster 3: Conservation & Funding**

- KPI section showing preservation status and last restoration year.
- Funding vs. visitor ratio charts to reveal resource imbalance.
- Impact scoring of tourism/human activity on site sustainability.

**Cluster 4: Decision Support**

- Real-time alerts or flags for endangered or high-risk sites.
- Exportable conservation reports for NGOs and policymakers.
- Filters based on tourist behavior or eco-rating (if data available).

## Step-3: Idea Prioritization

### 4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

**TIP**  
Participants can use their cursors to place or where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H key** on the keypad.

**Importance**  
If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

**Feasibility**  
Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

**Real-time alerts for endangered or high-risk sites**

**Visitor trend line charts to monitor annual tourism growth per site**

**Funding vs Visitor Ratio charts to identify underfunded, high-traffic sites**

**Global map of UNESCO sites with filters by region, site type, and preservation status**
